

2024 anonymized reviewer comments on high-ranking case reports:

- This is a case report of a rare disorder, presenting atypically in a pediatric patient; author(s) also perform a literature review ... and compare their presentation to adults.
- Relevant Dx for neurologists.
- relevant case to practicing neurologists.
- a good teaching case for a rare cause of [symptom]
- This is an interesting case report of a presentation that is more common in adults than in children. It highlights the importance of considering [condition] as a cause of [symptom].
- Important to bring awareness and remind people to have a high clinical suspicion in such cases
- The whole point of this study is that a child with [condition] has evidence of [previously unreported test finding]. This result appears to be the first evidence of a new [condition pathophysiology].
- Case report with interesting treatment algorithm in an ultra-rare disease.
- This case report of a rare condition is of interest because there are few cases reported (40, per authors).
- This is interesting as a rare disorder.
- [symptom] is quite rare in pediatrics and is even more rare in neonates.
- a good case report to raise awareness and share the presentation / treatment etc.
- [Symptom] is a rarer presentation of [condition]
- This case report is of interest to CNS membership and is appropriately balanced regarding the interpretation, acknowledging the multiple contributing factors and not overstating the correlation as causation
- This is extremely rare condition in child neurology so good to include...so such patients are diagnosed early.
- Interesting case report that challenges the [scope of differential diagnosis], highlights value of genetic reanalysis when symptoms evolve
- This abstract reports a case of [symptom] and highlights the importance of recognizing this entity and treating appropriately with a [treatment].
- interesting case report of adverse effect of [treatment] in a child with [condition], and expand described clinical phenotype
- Case report of a novel presentation of [condition]. Relevant to CNS audience as it expands the knowledge base

Example highly scored case reports (all free to access in the October 2024 Annals of Neurology Abstract Supplement: <https://onlinelibrary.wiley.com/doi/10.1002/ana.27080>)

- Brain Puzzle: Decoding a case of LGI-1 autoimmune encephalitis
- Tolosa-Hunt Syndrome Presenting with Oculomotor and Abducens Nerve Palsy in an Adolescent
- Rapid onset Hemiparesis preceding Seizure onset in a case of Rasmussen Encephalitis in a 7-year-old Female Athlete
- Headache and Cranial Nerve Palsy: An Unusual Presentation of Renal Cell Carcinoma in a Pediatric Patient
- When the strong become weak: Myasthenia Gravis in an elite female teen athlete
- UGDH Variants Cause Congenital Muscular Dystrophy with Hypoglycosylation of α -Dystroglycan
- Treatment of status dystonicus in a child with SOX2-anophthalmia syndrome with deep brain stimulation
- A rare case of LAMA1-related Poretti-Boltshauser syndrome involving supratentorial brain abnormalities
- Congenital Hemifacial Spasm in a Neonate with a Pontine Mass: diagnostic and management challenges
- A Case of Isolated Multiple Cranial Nerve Enhancements in Pediatric Myelin Oligodendrocyte Glycoprotein Antibody-Associated Disease (MOGAD)
- Epilepsia Partialis Continua following alemtuzumab treatment: first report following solid organ transplant and the first in a pediatric patient
- Juvenile ALS masquerading as an acquired inflammatory neuropathy
- Brought Back to Life: Pediatric Patient Survives Near-SUDEP Without Resuscitation
- Expanding MECP2 Beyond Dystonia – A Case Report of Infantile Spasms Characteristic of Mitochondrial Dysfunction.
